Esteemed customers:

Production Stoppage of Sanyo-make AC Servomotors

Dear Sirs,

Thank you very much for your continued patronage and warm supports to us.

At this time, we need to inform you that Sanyo Denki will be stopping the production of some models of their AC servomotors in several months, which are used on Toyo Plastics Injection Molding Machines and Die-casting Machines. In addition, some discontinued motors cannot be replaced with any other currently-available motors.

Given above situation, we, at Toyo, are preparing to keep such servomotors in stock for future servicing; however the number will be limited. Therefore, just in case the servomotor is not available when necessary, we would like to recommend that you also keep the servomotor at your place.

If you intend to purchase the motor, we would like you to place an order with us by December 31, 2018.

Please feel free to contact our sales or servicing personnel for details or any questions. We would appreciate it if you could kindly understand above situation.

Yours sincerely,

Kazunori Sogame, President
